

Kito Crosby Entertainment Group

PRODUCT GUIDE

ENTERTAINMENT HOISTS, CHAIN, AND LIFTING ACCESSORIES

WHERE RELIABILITY TAKES CENTER STAGE

After years of research and development, Kito Crosby has designed the products in this guide specifically for the entertainment industry. We offer fully customizable products that can easily handle theatrical equipment needs from small studios and nightclubs to massive arenas and stadiums.

Built with industry-specific features, these products are engineered to endure the constant packing, rigging, and teardown as they travel across the world, always making sure that the show goes on – no matter what.

Krewmate TNER Entertainment Chain Hoist

Features & Benefits

The Kito Krewmate entertainment chain hoists were designed using the latest technology for handling stage and entertainment equipment. These high quality, low-headroom, full-featured hoists provide reliable performance for use in theatres, concert halls, arenas, studios and outdoor venues.

- 1 Completely sealed hoist body is suitable for both indoor and outdoor applications, including harsh environments. Gaskets throughout the hoist provide IP55 rating (please refer to Owner's Manual for more information). Sleek rounded aluminum body with no sharp edges.
- 2 Optional reversible black canvas chain container to meet BGV-D8 regulations. Designed with two secure attachment points.
- 3 Nickel-plated, DIN chain for superb durability, strength, and corrosion resistance. Optional black chain available. EN 818-17 standard.
- 4 Flexible, soft-grip handles for comfortable and easy handling.
- 5 360 degree swivelling top and bottom hooks with heavy-duty hook latches. Ball bearings produce smooth rotation.

Standards

Hoist exceeds stringent world standards; complies with German regulation BGV-D8. Standard configuration meets CE Declaration.

Pull-Rotor Motor Brake

World's most reliable entertainment hoist brake. Simple design. No brake coil to fail or brake disc to replace. 10 year hoist brake warranty.

Quiet Load Sheave

Deep groove pockets fully support the load chain during operation. Reduces vibration and chain wear and provides a true vertical lift.

Long Life Friction Clutch

Carbon friction material provides consistent performance over a wide temperature range. Protects hoist from damage and prevents overwinding.

Heat Treated Helical and Spur Gears

Precision machined for long life. Grease lubrication results in quiet and smooth operation. No oil change required.

Grease-Packed Gearbox

For demanding entertainment applications.

Plug & Play Voltage Changer

Quickly change between 208/230V and 460V. Saves valuable time during setup and integration and minimizes prep time from venue to venue.

Low Profile Upper/Lower Limit Switches

No adjustment required. Protects hoist and provides maximum travel.

Unique Chain Guide

Provides quiet and smooth guiding of chain. Easily replaced without disassembly of the hoist. Durable, heavy cast iron construction.

Pendant (Pickle)

Optional two button pendant for up and down functions and can be customized with pendant cord at any length. IP65 rated. Emergency stop or black pendant also available.

Krewmate TEM | TSEM Mini Entertainment Chain Hoist

Features & Benefits

The Kito Krewmate Mini three phase entertainment chain hoists were designed with a state-of-the-art control system using solid state relay (SSR) technology and a microcontroller unit (MCU) to increase the longevity of the hoist and provide superior safety functions. These high quality, low-headroom, fully-featured motors provide reliable performance in theaters, concert halls, arenas and studios.

- 1 Compact and rugged die-cast aluminum body with no sharp edges. Superior ingress protection makes it suitable for both indoor and outdoor applications. IP65 rated. Conveniently fits inside 12 inch truss.
- 2 360 degree swivelling top and bottom hooks with heavy-duty hook latches. Optional fixed hook available.
- 3 Nickel-plated, DIN chain for superb durability, strength and corrosion resistance. EN 818-17 standard.

Standards

Hoist exceeds stringent world standards; complies with German regulation BGV-D8, US ASME/ESTA standards and is UL listed to UL1340/CSA 22.2. Certified to machinery and directive marked CE.

High Performance Motor Brake

Fast acting and durable current driven electromagnetic brake. 5 year warranty.

Friction Clutch

Rotor integrated friction clutch outside of the load path provides consistent performance over a wide temperature range.

Low Profile Upper/Lower Limit Switches

Protects the hoist from overwinding and offers exceptional headroom.

Unique Chain Guide

Discharges chain from the side of the hoist body preventing tangling when winding up slack chain.

Solid State Relay Board

No mechanical contacts for extended lifetime and microcontroller provides protection from fast reverse, phase loss & reversal (3ph), overcurrent, overtemperature, and overvoltage. Includes electronic overload limiter and an LED error indicator.

Grease-Packed Gearbox

For demanding entertainment applications.

Chain Container

Optional reversible black canvas chain container to meet BGV-D8 regulations. Designed with two secure attachment points.

Pendant (Pickle)

Optional two button pendant for up and down functions and can be customized with pendant cord at any length. IP65 rated.

Additional Hoists & Accessories

TUBC Entertainment Universal Beam Clamp

Adjustable and efficient, cost effective method for most work holding and positioning applications.

Available with optional suspender for perpendicular mounting and for oversized hooks.

Available in 1–5 Ton (tonne) capacities.

TUBC with optional suspender

LB Lever Hoist

Offers a low headroom, compact design that is perfect for use in tight quarters.

Available in 3/4–9 Ton (tonne) capacities.

CF Hand Chain Hoist

A practical alternative when power is not available.

Available in 1/2, 1 and 2 Ton (tonne) capacities.

LX Mini Lever Hoist

This unique puller fills a wide range of uses in entertainment applications.

Available in 1/4–1/2 Ton (tonne) capacities.

CX Mini Hand Chain Hoist

Lightweight and compact.

Available in 1/4 – 1 Ton (tonne) capacities.

Options

Road Cases

Kito Crosby Entertainment Group offers rugged road cases for easy transportation and motor storage. Two sizes are available to hold either 1, 2, or 4 motors in one case.

- Heavy duty recessed hardware
- 600 pound 4" polyurethane swivel casters
- Stackable up to 3 cases high

Pendant (Pickle)

A two button pendant is available for up and down functions. Pendant can be customized with pendant cord at any length.

- IP65 rated
- Emergency stop or black pendant also available

Pendant and Power Supply Cords with Hubbell Connectors

Hubbell Connectors for both power supply cord and push button cord are available for quick installation.

- Male and female ends

Control and Power Supply Cord with Pin Connector

Socapex compatible extension for hoists and motors

- 7 or 14 pin available

Black Chain (TNER Series)

Grade 80, High strength black chain for low visibility.

Bullard® and Shur-Loc® Hooks

These hooks offer a positive locking latch feature.

Crosby Straightpoint Radiolink Plus Wireless Tension Load Cell

Radiolink Plus Wireless
Tension Load Cell

Wireless handheld SW-HHP

Can be used with HHP2
Mobile Application

Features

- Hardened bushes to accept industry standard shackles
- Std. AA batteries 1200hrs
- Easy no tools access
- Internal antennae
- Environmental protection IP67/NEMA6
- High quality hard anodised aerospace aluminum
- Angular ends to reduce weight and snagging when rigged
- Aluminium 2014-T6, load-bearing bushes EN24T
- Black anodized to BS EN 12373-1:2001 Class 10. Bushes clear passivated.
- MTBF to WLL: Typically 50 million cycles
- Elongation: Typically <0.4mm / at WLL
- Can be used in combination with Crosby Straightpoint 'INSIGHT' high speed wireless data logging software for simultaneous control, display and real time data logging of up to 126 Crosby Straightpoint wireless load cells.
- Operating temperature: -10° to +50°C / 14° to 122°F
- Two versions of the RLP are available:
 - Long range 2.4GHz version providing industry-leading wireless range of 1000m or 3280ft to Crosby Straightpoint's SW-HHP handheld (up to 4 cells) or software options (up to 126 cells).
 - Bluetooth output and can be connected to any smart phone running our free HHP app on iOS or Android, at ranges up to 1000m or 328ft (up to 4 cells). Includes wireless handheld SW-HHP as standard
 - 200Hz peak hold
 - 90db audible overload alarm
 - Multiple display units (t/lbs/kg/kN)

Crosby Straightpoint Wireless Load Shackle

Wireless Load Shackle

Wireless handheld SW-HHP

Can be used with HHP2 Mobile Application

Features

- Internal antennae with wireless range of 1000m or 3280ft
- Electronics housed in a hard anodised enclosure
- Environmentally sealed to IP67 or NEMA6
- Battery Life of 1200hrs from 4 x AA batteries
- Internal Antennae
- Remote On-Off from handheld display or software
- ATEXZones 0,1&2 available
- 5:1 Safety factor
- Temperature range: -10 to +50 °C / 14 to 122 °F
- Data rate: 3 updates per second
- Three versions of the WLS are available:
 - Long range 2.4GHz version providing industry-leading wireless range of 1000m or 3280ft to Crosby Straightpoint's SW-HHP handheld or software options.
 - Bluetooth output and can be connected to any smart phone running Crosby Straightpoint's free HHP app on iOS or Android, at ranges up to 100m or 328ft.
 - ATEX/IECEx for hazardous areas, zones 0, 1 & 2. Providing a wireless range of up to 500m or 1640ft to SW-HHP-ATEX handheld.

Crosby Straightpoint Cabled Shackle Load Cell

Cabled Shackle Load Cell

Features

- Robust construction
- Compact size and low headroom
- Every Loadshackle proof tested
- Lightweight
- Unrivalled resolution
- Push button tare
- Environmentally sealed to IP67/NEMA6
- Peak hold
- Manufactured using industry-leading brand shackles
- mv/v or analog signal options
- Advanced options available

Crosby S-209T Theatrical Shackle

S-209T Theatrical Shackle

Features

- Flat black baked on powder coat finish.
- Forged, Quenched & Tempered, with alloy pins.
- Working Load Limit and Grade 6 permanently shown on every shackle.
- Fatigue rated to 20,000 cycles at 1-1/2 times the Working Load Limit.
- Industry leading 6 to 1 Design Factor.
- Screw pin anchor shackles meet the performance requirement of Federal Specification RR-C-271H, Type IVA, Grade A, Class 2, except for those provisions required of the contractor.
- Meets the performance requirements of EN 13889.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements. Importantly, these shackles meet other critical performance requirements including fatigue life, impact properties and material traceability, not addressed by ASME B30.26.

Crosby S-505 Swaging Sleeve

Features

S-505 Swaging Sleeve

- For flemish eye wire rope splicing.
- Designed for low temperature toughness.
- Resists cracking when swaged (equals or exceeds stainless steel sleeves).
- Special processed low carbon steel.
- COLD TUFF® for better swageability.
- Can be stamped for identification after swaging without concern for fractures when following these directions:
- Use round corner stamps to a maximum depth of 1.38mm.
- The area for stamping should be on the side of the sleeve in the plane of the sling eye, and no less than 7mm from either end of the sleeve.
- Standard steel sleeve terminations have efficiency ratings as follows based on the catalog strength of wire rope.
- Do not use on wire rope size other than size shown.

S-505 Termination Efficiency		
Size (mm)	Type of Wire Rope *	
	IWRC	FC
6 - 26	96%	93%
28 - 52	92%	89%
56 and Larger	90%	87%

1041483	3-1/2	84	1193247	6 x 12	1191121	6 x 12	141

QUIC-PASS® system not available for these metric rope sizes. Note: Fittings designed only to be used on exact sizes listed.

** NOTE: S-505 Standard Sleeves are recommended for use with 6 x 19 or 6 x 37, IPS or XIP (EIP), XXIP (EEIP), RRL, FC or IWRC wire rope. Before using any National Swage fitting with any other type lay, construction or grade of wire rope, it is recommended that the termination be destructive and documented to prove the adequacy of the assembly to be manufactured.

Crosby HG-228 Jaw & Jaw Turnbuckle

Features

- End fittings are Quenched & Tempered or normalized, bodies heat-treated by normalizing.
- Hot-dip galvanized steel.
- TURNBUCKLES RECOMMENDED FOR STRAIGHT OR IN-LINE PULL ONLY.
- Forged jaw ends are fitted with bolts and nuts for 1/4" through 5/8", and pins and cotters on 3/4" through 2-3/4" sizes.
- Modified UNJ thread on end fittings for improved fatigue properties.
- Body has UNC threads.
- Lock nuts available for all sizes.
- Fatigue rated to 20,000 cycles at 1-1/2 times the Working Load Limit.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements. Importantly, these turnbuckles meet other critical performance requirements including fatigue life, impact properties and material traceability, not addressed by ASME B30.26.
- Meets the performance requirements of Federal Specifications FF-T-791b, Type 1 Form 1 - CLASS 7, and ASTM F-1145, except for those provisions required of the contractor. For additional information, see Warnings & Applications.

Crosby HG-226 Eye & Eye Turnbuckle

Features

- End fittings are Quenched & Tempered or normalized, bodies heat-treated by normalizing.
- Hot-dip galvanized steel.
- Turnbuckle eyes are forged elongated, by design, to maximize easy attachment in system and minimize stress in the eye. For turnbuckle sizes 6 mm through 64 mm, a shackle one size smaller can be reeved through eye.
- Modified UNJ thread on end fittings for improved fatigue properties. Body has UNC threads.
- TURNBUCKLES RECOMMENDED FOR STRAIGHT OR IN-LINE PULL ONLY.
- Lock nuts available for all sizes.
- Fatigue rated to 20,000 cycles at 1-1/2 times the Working Load Limit.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load, and temperature requirements. Importantly, these turnbuckles meet other critical performance requirements including fatigue life, impact properties, and material traceability, not addressed by ASME B30.26.
- Meets the performance requirements of Federal Specifications FF-T-791b, Type 1 Form 1 - CLASS 4, and ASTM F-1145, except for those provisions required of the contractor. For additional information, see the warnings and applications section.

5:1 Design Factor. Proof Load is 2.5 times the Working Load Limit. *Mechanical galvanized

Crosby A-341 Alloy Pear Shaped Link

A-341 Alloy Pear Shaped Link

Features

- Alloy steel — Quenched & Tempered.
- Individually Proof Tested at 2 times Working Load Limit with certification.
- Sizes up to 2" are forged.

Crosby S-279/M-279 UNC Shoulder Type Machinery Eye Bolt

S-279/M2-79 UNC Shoulder Type Machinery Eye Bolt

Features

- Forged steel - Quenched & Tempered.
- Working Load Limits shown are for in-line pull. For angle loading, see Warnings & Applications.
- Fatigue rated at 1-1/2 times the Working Load Limit at 20,000 cycles.
- Recommended for in-line pull.
- S-279 threaded UNC.
- M-279 metric threaded.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements. Importantly, these bolts meet other critical performance requirements including fatigue life, impact properties and material traceability, not addressed by ASME B30.26.

Crosby G-450 Wire Rope Clip

Features

G-450 Wire Rope Clip

- Each base has a Product Identification Code (PIC) for material traceability, the name Crosby or "CG," and a size forged into it.
- Based on the catalog breaking strength of wire rope, Crosby wire rope clips have an efficiency rating of 80% for 1/8" through 7/8" sizes, and 90% for sizes 1" through 3-1/2".
- Entire clip is galvanized to resist corrosive and rusting action.
- Sizes 1/8" through 2-1/2" and 3" have forged bases.
- All clips are individually bagged or tagged with proper application instructions and warning information.
- Clip sizes up through 1-1/2" have rolled threads.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements. Importantly, these wire rope clips meet other critical performance requirements, including fatigue life, impact properties, and material traceability not addressed by ASME B30.26.

*Electro-plated U-Bolt and Nuts. ** 2-3/4" and 3-1/2" base is made of cast steel.

Peerless 6/0 Studio Chain

Features

- Theater chain with low gloss black finish
- Used for hanging stationary lights, fixtures and/or battens
- Compatible with standard 1/4" chain hardware
- PSC & USA hallmark is stamped on every 11 links of chain
- Not approved for overhead lifting
- Made in the USA

6/0 Studio Chain

6/0 Studio Chain Imperial Specifications & Dimensions

Stock #	Finish	Trade Size (in)	Wire Diameter (in)	Inside Link Dimensions		Quantity (per package)	Net Weight (lb)	Working Load Limit (lb)
				Length (in)	Width (in)			
5032066	Black	6/0	0.28	1.50	0.45	1000 ft/drum	620	2,000
5032062	Black	6/0	0.28	1.50	0.45	100 ft/carton	62	2,000
5032060	Black	6/0	0.28	1.50	0.45	50 ft/carton	31	2,000
5032003	Black	6/0	0.28	1.50	0.45	250 - 3 ft pieces/drum	443	2,000

Users must comply with all local, state, and federal regulations pertaining to overhead lifting requirements.
DO NOT exceed the working load limit.

6/0 Studio Chain Metric Specifications & Dimensions

Stock #	Finish	Trade Size (in)	Wire Diameter (mm)	Inside Link Dimensions		Quantity (per package)	Net Weight (kg)	Working Load Limit (kg)
				Length (mm)	Width (mm)			
5032066	Black	6/0	7	38	11	1000 ft/drum	281	907
5032062	Black	6/0	7	38	11	100 ft/carton	28	907
5032060	Black	6/0	7	38	11	50 ft/carton	14	907
5032003	Black	6/0	7	38	11	250 - 3 ft pieces/drum	201	907

Users must comply with all local, state, and federal regulations pertaining to overhead lifting requirements.
DO NOT exceed the working load limit.

Peerless 7mm Entertainment Rigging Chain

7mm Entertainment Rigging Chain

Features

- Readily compatible with standard 1/4" chain hardware
- Alloy steel material with 0.27" diameter and 3,250 pound working load limit
- Heat treated with each link proof tested to ensure weld & material integrity
- A6 and traceability code every 10 links and TC on the back of each link
- Manufactured and tested in accordance with ASTM A413
- Black TRAC® finish
- Made in the USA

7mm Entertainment Rigging Chain Imperial Specifications & Dimensions

Stock #	Chain Size (mm)	Wire Diameter (in)	Inside Link Dimensions		Quantity (per package)	Net Weight (lb)	Working Load Limit (lb)
			Length (in)	Width (in)			
8611517	7	0.27	1.24	0.49	800 ft/drum	516	3,250
8612646	7	0.27	1.24	0.49	100 ft/drum	65	3,250

7mm Entertainment Rigging Chain Metric Specifications & Dimensions

Stock #	Chain Size (mm)	Wire Diameter (mm)	Inside Link Dimensions		Quantity (per package)	Net Weight (kg)	Working Load Limit (kg)
			Length (mm)	Width (mm)			
8611517	7	6.8	31	12	800 ft/drum	234	1,474
8612646	7	6.8	31	12	100 ft/drum	29	1,474

Peerless Trac Chain[®]

Features

- Ideal for: Entertainment rigging applications where bridle adjustability is required
- Super Strength: Grade 80 alloy material with 1/2" diameter and 6 ton working load limit
- Easy Identification: PTC8 hallmark on every 5 links & USA on the back of each link
- Proof Tested: Each link proof tested to assure weld and material integrity
- Heat Treated: Alloy steel material provides long life. 4:1 Design Factor
- Low gloss black finish
- Made in the USA

eepos one System

The eepos one lightweight crane system has earned global recognition for its virtually unlimited range of applications. It is the perfect solution for the smooth and controlled movement of cameras, lights, LED screens, curtains, and any other custom applications in theaters, studios, and production environments. Fully customizable with a black finish upon request for a seamless integration with any entertainment system.

The modular aluminum crane system for load transport up to 2t

The eepos one system's modularity, lightness, and versatility allows for customer-specific requirements to be implemented individually. With support for any load up to 2t, it can be easily integrated into any production infrastructure and offers a high level of safety, stability, and ease of operation.

Innovative and modular crane technology

Customers can use eepos one as an area crane system with a span of up to 14 m, and can be combined with manually, electrically, or pneumatically operated crane bridges. Optionally, customers can add slewing cranes and power supply columns. All eepos products are compatible with each other, which means customers can expand and add to the system at any time.

Simple and fast design

With the help of the online Crane Designer tool, users can configure a light crane system adapted to their requirements within a few minutes and instantly receive pricing and technical drawings. Alternatively, eepos can develop solutions for the use and installation of the light crane systems according to specific needs upon request.

Ergonomic and smooth-running

All eepos products are designed for easy handling, extreme smoothness, and jam-free transport of load, enhancing both safety and operator comfort.

Uncomplicated assembly

Thanks to its lightweight design and numerous integration options, eepos one is installed quickly and easily — even in existing ceiling structures — without the need for extensive reinforcements. Upon request, an experienced team can provide professional installation and annual UVV safety inspection.

eepos one Profiles

eepos one Profiles **Standard** **

Features

Profiles XS to XXL

- Aluminum
- Manufactured using the extrusion process from the aluminum alloy EN AW 6063 T66
- The hollow chamber design results in low dead weights for profile sizes XS to XXL, even for high load-bearing capacities

Select the right profile size

- The choice of profile depends on the planned load-bearing capacity and the required span
- Selecting the right profile size prevents unnecessary additional costs can be avoided
- Assistance available to ensure the correct size is selected

eepos one Trolleys

eepos one Trolleys **Standard** **

Features

8 wheels for consistently smooth travel

- Aluminum forged
- 8 rollers arranged on 2 levels
- The trolleys touch the aluminum profiles at all times, ensuring perfect smooth running without jerking or jamming, regardless of the direction of load

Universally compatible with eePOS one

- Compatible with all components in the eePOS one modular system
- Continue to use them even with subsequent adjustments or conversions to assembly lines for larger or smaller loads
- Cost saving and flexible

** Stocked item is standard version. Black entertainment version available upon request.

Training – Intermediate Rigging & Hoisting

Fundamentals of Rigging (Day 1 & 2)

Course Overview

This course provides attendees with the fundamental knowledge and skills needed to identify unsafe conditions when using Crosby rigging hardware with wire rope, chain, and synthetic slings.

Learning Objectives

By the end of this course, participants will be able to:

Understand the requirements for the following:

- Risk management
- Basic rigging plan
- Types of loads, static, dynamic, unbalanced
- Design factor when it comes to working load limits, rate capacity connecting points
- Lifting terminology and explanation: bridle, basket, and more

Identify the basic application, selection and inspection requirements for:

- Crosby rigging hardware

Recognize the inspection standards outlined in ASME B30.9 for:

- Wire rope slings
- Chain slings
- Synthetic slings

Apply Crosby tools and formulas to:

- Determine load weight
- Locate the center of gravity
- Calculate sling tension before lifting operations

This course is designed to enhance workplace safety and ensure compliance with rigging and lifting best practices.

Reach out to your local representative about available training opportunities, or contact training@kitocrosby.com

Guidelines for Chain Hoist Operation (Day 3: Half Day)

Course Overview

This session provides essential training on the safe operation of Kito powered chain hoists. Participants will learn proper pre-operational inspection methods, understand how hoist design impacts safety, and ensure the correct safety procedures are followed.

Learning Objectives

By the end of this session, attendees will be able to:

- Conduct pre-operational inspections of Kito powered chain hoists
- Recognize how hoist design affects user safety
- Apply proper safety procedures to prevent risks and ensure compliance

This training enhances workplace safety by equipping participants with the knowledge and skills needed for safe and effective hoist operation.

KREWMATE Entertainment Chain Hoist Inspection and Repair Training

Course Overview

This course provides attendees with the fundamental knowledge and skills needed to inspect and repair specifically the Kito KREWMATE collection of electric powered entertainment chain hoists (TNER, TEM, & TSEM)

Learning Objectives

By the end of this course, participants will be able to

- Inspect and conduct standard repairs
- Fully disassemble and reassemble the hoist
- Understand hoist electrical basics, including wiring diagrams and the hoist electrical system
- Troubleshoot errors

Reach out to your local representative about available training opportunities, or contact training@kitocrosby.com
