

Roundsling Hook RH

The RH-hook is the perfect load connection solution, combining the advantages of both soft lifting slings and grade 100 components. It can be inserted into a softsling and is quicker and safer to use than the commonly used shackle. The RH-hook is a connector as well as a hook, which gives the user increased flexibility, safer use and increased durability of the soft slings.

The RH-hook comes with a blocking pin, but thanks to the narrow opening it may be used without blocking pin.

Rapid Rescue Chain Kit

For a quicker and safer rescues

A few seconds can make a significant difference in a serious accident rescue operation. Vehicle design and extreme deformations common in accidents can make the work of emergency workers challenging.

The Gunnebo Industries Rescue Chain Kit is simple and effective for patient-friendly rescues in various accident scenarios, including frontal, side, and rear impacts.

The methodology and equipment is standardized in many parts of Europe, including Germany and Scandinavia. The pulling moves the fire brigade's working space to the outside and allows parallel work of medical care and technical rescue.

The kits are available in sizes from 6 mm (7/32 in) up to 16 mm (5/8 in) and working load limits up to 10t (22 600 lb). Most commonly 8 mm (5/16 in) or 10 mm (3/8 in) are used, along with appropriately sized synthetic slings and synthetic sling hooks.
